

Windsor® Starter Scotchgard™ Protector

Starter Shingles - Aging, Algae, and Impact Resistant

Required for Windsor® installation, Windsor® Starter shingles are designed to fortify the first course of shingles most prone to wind uplift, shingle blow-off, and moisture migration. Windsor® Starter shingles are made with our patented **NEX® Polymer Modified (SBS Rubberized) Asphalt**, an innovative technology that infuses rubber and plastic polymers to strengthen the asphalt core of the shingle for superior impact resistance, granule adhesion, all-weather resilience, and aging longevity.

Windsor® Starter shingles are also sustainable. Upcycled polymers from used tires and plastic bags improve durability and aging resistance, while helping reduce landfill waste. Sustainability without sacrificing performance.

INSTALLED THIRD

When installing a complete 5-component system, starter shingles are installed third, after the underlayment, and prior to the field (roofing) shingles. Correct installation of Windsor* shingles requires the use of 2 starter shingle products: Smart Start* starter shingles followed by Windsor* Starter shingles.

COLOR MATCH

Windsor® Starter shingles match Windsor® shingle colors.

See shingle colors on a roof, or your roof, at www.malarkeyroofing.com/roof-designer.
